PRETTL®

Reference letter

Mr. Zoltán Kovács, electronic engineer, worked at Prettl Hungária Ltd. (Szekszárd) in 2006 as technical leader with a 6-month contract.

During this time, he was responsible directly to lead and developed the engineering team of five engineers and indirect lead the maintenance team of 11 persons. This team was responsible for the maintenances of all machines and devices for 385 productive workers.
He leaded, developed and active take part on the NPI activities in Hungary. He participates active on all project discussions in Germany.

He coordinated the transfer and set up a new, semiautomatic barrel molding line from Germany to Hungary.

His daily job contains the control and development of production.
The elongation of the 6-month contract has not been accomplished because Prettl has changed his strategy.

Based on his background and mentality Mr. Kovács is capable to lead an engineering or production organization focusing on quality, efficiency and cost.

Szekszárd, 2006.09.13.

István Moldovánu

Managing Direktor
Prettl Hungária
